Family Bridge

Free co-parenting app
iPhone · Android · Web

FOR SEPARATED AND DIVORCED PARENTS

Co-parent with less conflict and more clarity.

Family Bridge keeps messages, the custody calendar, shared expenses and your children's documents in one place, so communication stays calm, organized and focused on the kids.

iPhone, Android and web

One account on the App Store, Google Play or any web browser.

Each parent in their own language

English, Español, Português and Français: one parent can use English and the other Spanish.

Free forever. Not a trial.

The free plan never expires and covers the essentials:

- Unlimited messaging
- Custody calendar
- Expense log
- 3 documents

Free plan: unlimited text messages, 1 child, 20 calendar events and 10 expenses per month, and up to 3 documents (sharing them with the other parent: free on the web; on iPhone and Android with the next update). More than 3 documents come with Pro. Each parent has their own free account.

What you can do

Documented messages

Every message is saved with date, time and read receipts, organized by child and topic. From the iPhone or Android app, export the full conversation to PDF for your lawyer or mediator, including edits and deleted messages. PRO

Custody calendar and exchanges

Start from a ready-made schedule (alternating weeks, 2-2-3, 5-2-2-5 and more) and add exceptions. Propose a pickup or drop-off; the other parent accepts, declines or counter-proposes.

Expense log

Log shared costs and how they are split; the other parent approves or declines each one. **Family Bridge records expenses. It does not process payments.**

Documents

Keep your children's school, medical and custody documents in one place: **3 free · more with Pro**. Sharing them with the other parent is free on the web and comes to the iPhone and Android apps with their next update.

Grandparents and babysitters

Give relatives or caregivers access with permissions per child and per section (2 people on the free plan).

Family AI Helper PRO

Optional. Before you send, it checks the tone of your message and suggests a calmer way to say it. You always decide what gets sent.

Get started in 3 steps

1. **Scan the code or go to familybridge.app**
   Download it from the App Store or Google Play, or use it in any web browser.
2. **Create your free account**
   Add your child and set up the custody calendar.
3. **Invite the other parent**
   By email or with a 6-digit code. Invitations are free and each parent has their own account.

App Store · Google Play · Web

Family Bridge Pro is optional

US$5.99/month or US$39.99/year
per parent

The free plan covers the essentials, and each parent decides on their own whether to upgrade. Responding (approving an expense, accepting an exchange) is always free. Pro removes the limits (including the 3-document limit) and adds PDF export, attachments, Family AI Helper and expense receipts.

Good to know

Family Bridge is a communication and organization tool. It does not give legal advice, counseling or mediation, and it never moves money between parents. We never sell your personal information.

Questions? Write to us.

We answer in English and Spanish.
